

California GIS Council Workgroup Report

Workgroup: Workgroup page*: Workgroup Chair: paul.veisze@parks.ca.gov	Report Date: June 2, 2016
--	------------------------------

*See the workgroup page for workgroup charter, members, contact information, and prior reports.

Requests for Council Action

Amplify to CA State GIO the need to release the best-practices version of CA NextMap, including and not limited to: Metadata (esp. Use_Constraints and Dates of Collection / Statewide Index Map).

Status Update

Initial, portable harddrive distribution of CA NextMap was conducted by the State GIO, CA Dept. of Fish and Wildlife, CA Dept. of Conservation, CA State Parks, and others. Artifacts associated with the scale of the downloaded tiles were discovered by Conservation. The EWG is standing by for the CA GIO's reply on requested information.

The EWG Chair informally recruited colleagues several agencies to conduct CA NextMap testing, once an authoritative copy and metadata become available.

Persons interested in participating in CA NextMap access / testing may email paul.veisze@parks.ca.gov

Legislative/Policy Update

None.

Next Actions & Key dates

Conservation and State GIO to confer on solutions for the artifact problem.

Action	Key Date
Next EWG meeting	8/31/16
The USGS 3DEP elevation program invites posting to Updated 3DEP Project Collector Tool for new LiDAR/Elevation project AOIs under consideration for acquisition in the next 1 to 3 years.	June 2016
