

California GIS Council Workgroup Report

Workgroup: State Plane Coordinate System Workgroup page*: Workgroup Chair: Nathaniel Roth	Report Date: December 12, 2019
--	-----------------------------------

*See the workgroup page for workgroup charter, members, contact information, and prior reports.

Requests for Council Action

Propose: A simple request that zones for California use the population weighted methodology demonstrated in the example zone 5 proposed by NGS. Similarly that a population weighted Oblique Mercator be prepared as a single statewide zone. Decisions on the detailed parameters to be left to the discretion of NGS and CSLA.

Status Update

Based on the prior discussion to await a response from the California State Land Surveyor’s Association we have been waiting for CSLA to have their meeting or release information. They have not done so yet. P. Tami is inquiring about their intention to provide a response as the time is getting very late for submitting an intent to request a deviation from the defaults proposed by NGS.

Legislative/Policy Update

None

Next Actions & Key dates

List next actions and key dates

Action	Key Date
Next workgroup meeting	TBD
J. Dudas to participate in CLSA workgroup	
Deadline to submit a request to NGS	3/31/2020
