Get Metadata Ready!

[Metadata Essentials for AI-Ready GIS | Esri Training Seminar \(1 hour\)](#)

- **Understand** factors that impact content discoverability by AI and non-AI tools.
- **Optimize** geospatial content for human discovery and AI readiness.
- **Discover** tools that streamline metadata creation.
- **Apply** well-structured metadata to support governance initiatives and maximize the value of your GIS

[Exploring and Importing Metadata in ArcGIS Pro | Esri Training Video \(5 min\)](#)

[Fundamentals of Data Management | Learning Plan \(11 courses\)](#)

Professional Services workshops or activities for data governance.

Get AI Ready!

[Introduction to AI in ArcGIS | Esri Training Web Course](#) (1 hour/5 min)

- **Learn** about the ArcGIS geospatial AI platform.
- **Understand** Esri's approach to and safeguards for trusted AI in ArcGIS.
- **Explore** GeoAI implementation use cases and best practices.

It's helpful to have basic knowledge of one or more ArcGIS products. Consider taking:

[ArcGIS Fundamentals | Learning Plan](#)

For Instructor Led classes, consider

[ArcGIS Online: Essential Workflows | Esri Training Instructor-Led Course](#) (1 day)

[ArcGIS Pro: Essential Workflows | Esri Training Instructor-Led Course](#) (3 days)

Get GeoAI Ready!

Understanding GeoAI in ArcGIS | Esri Training Seminar (1 hour)

- **Automate** data creation and management to save time and support more informed and confident decision-making.
- **Incorporate** spatial tools and algorithms to build more accurate predictive analysis models.
- **Use** a pretrained model to detect, extract, and classify information from imagery, video, lidar data, and text.

GeoAI Essentials | Learning Plan (17 courses)

- **Extract** geospatial data with deep learning.
- **Perform** predictive analysis using machine learning.
- **Find** patterns and clusters.

Spatial Data Science: The New Frontier in Analytics | Esri Training MOOC Course (Sept 23)

But Wait, There's More!

We are developing two new classes for AI.

- Focused on Assistants for two of our commonly used products
- ½ day classes

Various ways to engage:

- Users: Learning plans, web course, videos, instructor led classes
- Agency or Programs: Workforce development strategy and plan, activities and workshops

Want to Stay up to date?

Catch my Monthly Training Update, sent to your inbox. Connect with me @Drichards@esri.com and I'll send it out to you.

Remember.....

AI is advancing, but human intelligence remains crucial for true innovation. Let's embrace AI's power while staying true to what makes us human – our creativity, empathy, and problem-solving skills

Enamul Haque

Thank You!
